The 16nm chips die easily due to overheating, therefore it is recommended to install the S9 in a place like a garage or a dedicated mining farm.

I will also explain how to set it up properly Let's get started Power Consumption If you don't live in China, then power consumption will probably be the main factor that affects ROI.. The company is well-known for ASIC miner models such as the and S7 Sha256 Mining Profitability - Ethereum Mining Calculator Discount Genesis Mining <http://tinyurl..> Efficiency and ROI As for today, there is no more powerful Bitcoin miner than the S9.. This is due to the fact that when a power supply works at its limit 24/7 it usually suffers from overheating, which makes it less efficient.

The S9 is not a bedroom miner If you want to have something for home usage, then the R4 is probably the miner to go.. There was a time when anyone could mine Bitcoin using their gaming GPU's However, with the addition of new miners and mining farms to the global mining pools, the possibility to mine Bitcoin at home vanished – no GPU could deliver the required Bitcoin hashrate to be profitable.. Unlikely the, the S9 is rather noisy It comes with two big-size high-revolution fans that produce about 77-80 Db of constant noise (the equivalent of a vacuum cleaner).. It's always better to have a more powerful power supply for the miner If the power supply wattage limit is somewhere close to the consumption of the miner, then the efficiency of your rig might suffer, or the electricity costs might go up. In order to configure the miner, you need to log into that IP address through your Internet browser from a PC.. com Apr 16, 2017 - However, with the addition of new miners and mining farms to the global mining pools, the possibility to mine Bitcoin at home vanished – no GPU could deliver the required Bitcoin hashrate to be.. There was a lot of talk about the Antminer S9 since

it first came out However, cryptocurrencies are volatile, and in this article I aim to review whether it's still profitable to mine using the S9.. With an electricity cost of 0 10 \$/KWh, your estimated income per year is \$2,150, which is almost the double than the price of the miner.. This is why, a China-based company developed and released a set of ASICs that are accessible to the casual miner and have a reasonable ROI, allowing common people like you and me to start mining Bitcoin once again.
