#document TEI text body div table head

2.1. Some simple markup

The `<hi>` element is used for various forms of highlighting: e.g. `<bhold>`, `<italic>` and `<small caps>`.

The `<emph>` element is used for linguistic *emphasis* (‘highlighting’) (`<soCalled>`) nor with `<shouting>` (`<mentioned>`), `<transmogrification>`, (a technical `<term>`), for which the `<gloss>` tag might be used to supply a technical definition.

Now for some links! We will start by cross-referring to the next section.

Here is a simple `<ptr>` to it: `<[P1]>`. Here is a simple `<ref>`, a `<[#P1]>` reference to it.

An `<[http://www.bbc.co.uk]>` external link as ref and as ptr: `<[http://www.bbc.co.uk]>`.

3. Tables

Tables may have cells that span multiple columns and rows.

Pictures from Paganas mountains

Image	Description	direction
